

Purchase Order (PO) CSV Field Guide

Required and optional columns for PO CSV Import (Documents > Purchase Orders tab)

Rows sharing the same PO number are grouped into a single PO record, with each additional row becoming a line item. If a required column can't be found anywhere in the file, the whole import is rejected with one clear message. Amount values may include currency symbols/commas (e.g. "PKR 528,000") — cleaned automatically.

- REQUIRED**

— row is rejected/skipped if this field can't be found
- optional**

— imported if present, safely ignored if missing

FIELD	REQ?	ACCEPTED HEADER NAMES	NOTES
po_number	REQUIRED	Purchase Order No, Purchase Order Number, PO Number, PO No, PO#, PO Ref, PO Reference, po_number
